HM820-867

Revolutionary concept for
sewing design seams

Industrial Sewing Applications

HM820-867

Revolutionary concept for sewing design seams

Industrial sewing takes a giant step forward with the HM820-867 and its revolutionary rotating needle bar. The HM820-867 combines all the benefits of the M-type flat-bed triple transport machine with state-of-the-art technology by Habraken Machines.

Intuitive technology

The HM820-867 is a machine for sewing design seams in automotive and home upholstery. The twin-needle model is standard but of course you can remove one needle and extend the range of design stitches. The standard model is delivered with needle distances set at 4 mm, 6 mm or 8 mm.

Utilising the latest user-friendly technology, the HM820-867 is capable of creating a wide range of decorative stitching. You can simply select an appropriate design seam on the intuitive touch screen panel. Or you can compose your own stitch from scratch by combining features such as needle swap, reverse transport or stand, and optional second-stitch length.

Outstanding design

The sturdy design maintains all the aspects of the proven Dürkopp Adler transport mechanism, which is renowned for delivering outstanding performance. Dedicated high speed electronics ensure safe and reliable operation. Both needle and transport control are fully adaptive for speed and you can cross seams at up to 800 stitches per minute. The HM820-867 flat-bed is also available as a post-bed model. For more information, please contact:

Revolutionary concept for
sewing design seams

Industrial Sewing Applications

HM820-868

Revolutionary Concept For Sewing Design Seams

Industrial sewing takes a giant step forward with the HM820-868 and its revolutionary rotating needle bar. The HM820-868 combines all the benefits of the M-type post-bed triple transport machine with state-of-the-art technology by Habraken Machines.

Intuitive technology

The HM820-868 is a machine for sewing small leather goods and home upholstery. The twin-needle model is standard but of course you can remove one needle and extend the range of design stitches. The standard model is delivered with needle distances set at 4 mm, 6 mm or 8 mm.

Utilising the latest user-friendly technology, the HM820-867 is capable of creating a wide range of decorative stitching. You can simply select an appropriate design seam on the intuitive touch screen panel. Or you can compose your own stitch from scratch by combining features such as the needle swap, reverse transport or stand, and optional second-stitch length.

Outstanding design

The sturdy design maintains all the aspects of the proven Dürkopp Adler transport mechanism, which is renowned for delivering outstanding performance. Dedicated high speed electronics ensure safe and reliable operation. Both needle and transport control are fully adaptive for speed and you can cross seams at up to 800 stitches per minute. The HM820-868 post-bed is also available as a flat-bed model. For more information, please contact:
